EXPERIENCE

MarketShare LLC. (Predictive marketing analytics) <http://marketshare.com> Nov 2015 – Present (5+ months)

Font-End Developer

- Responsible for implementing new front-end features to Decision Cloud Strategy application (<https://decisioncloud.marketshare.com>) using Angular.js
- Componentizing UI features and functionality into reusable modules to share across applications.
- Managing the help center support website and keeping documentation up to date.
- Overseeing a small team of junior developers and participating in code review sessions.

Acorns Grow, Inc. (Micro-investing app) <https://acorns.com>

Jul 2014 – Oct 2015 (1 year 4 months)

Font-End Developer

- First front-end developer at Acorns startup and responsible for building the complete front-end of the native Acorns Web Application (<https://app.acorns.com>).
- Built on top of the Ember.js framework accompanied with QUnit for unit tests which ran in Travis CI.
- Used Bootstrap's grid system for achieving a completely responsive layout.
- Utilized Lodash.js and D3.js library for charting, Gulp.js for automation, and Docker containers for deployment to Amazon Elastic Beanstalk.
- Made use of ARIA standards for web accessibility and took preventative measures against XSS and CSRF.
- Built a chart image generator with Node.js for use in transactional emails.

Xtopoly, Inc. (Digital agency) <http://xtopoly.com>

Jul 2012 - Jun 2014 (2 years)

Full-Stack Developer

- Responsible for developing responsive websites, landing pages and iAb compliant rich media ad units for many major brand name companies.
- Worked with Angular.js, Backbone.js, Ember.js, Knockout.js, LoDash.js, Karma, Jasmine, Mocha, Grunt.js, SASS and LESS preprocessors, and PHP due to different client needs.
- Built internal RESTful APIs for handling conversion tracking on top of Node.js, Express.js and MongoDB.
- Leveraged Redis and Varnish for caching, and Nginx for load balancing.
